Build with Gemini XPRIZE | Managed by Devpost | CONFIDENTIAL

LEGEND:

■ COGS stands for Cost of Goods Sold and includes expenses to produce the service provided by the business.

■ SG&A stands for Selling, General, and Administrative Expenses and includes expenses to operate the business. If personnel is hired to do marketing activities, that expense would be under SG&A.

■ "Other Expenses" may include expenses like rent, travel, or other expenses not outlined in the P&L. If you include them, you must explain each expense line in your Devpost submission.

■ You must record revenue and expenses uses the "cash basis" method. "Cash basis" is a financial accounting method where revenue is recorded when cash is received, and expenses are recorded when cash is paid out.

■ If any expenses correspond to the use of resources that existed prior to the hackathon, then you must clearly outline and explain those expenses in your Devpost submission.
